All are welcome to both the services, and to the privileges of the reading room.

Crosley W. Wallace and Herman N. Tiemann, Jr., were among those who attended the automobile show in New York City, Friday.

Mrs. Catherine Farrell of Hawleyville, passed Thursday in Danbury. Mrs. James Bailey is among those on the sick list.

A large and very appreciative audience was present Thursday evening at the Town hall when Prof. W. B. Bailey gave a stereoscopic lecture on "Life in the Slums of Our Great Cities." Rev. Alexander Steele introduced the speaker.

The pictures began with tenement houses in Washington which had existed only four blocks from the White House. Views of Mulberry street, Mulberry Bend and the Five Points in New York City, which had been taken prior to the day of the great fire, showing plainly what life had been and what it is to-day the result of the work of great philanthropists and for its share and it would seem as if even residents of the beautiful Elm City would be surprised to learn of life on the dark side of that city.

Sweat shops, fire escape and their advantages and uses in various styles, lodging houses, filthy cellars, with cesspools which are permitted to exist unobserved and exposed. Prof. Bailey also showed how hard it was to teach those unfortunate the advantages of cleanliness and conveniences, and how the latter were abused when offered, as using bath tubs for various household purposes such as coal bins, etc. The speaker said in his introductory remarks that he thought when he had finished the people in the country would be satisfied that they had the advantage of their city cousins and satisfied with their healthy surroundings with miles of ground and pure country food, clean drinking water, bath tubs that are used as bath tubs and stables, chicken houses etc., many feet away from sleeping apartments instead of directly over them. The Men's Federation are deserving of a vote of thanks for the interesting and instructive evening offered.

More Conservative in Comments on California's Proposed Action.

(Special from United Press.)

Tokio, Jan. 23.—The conservative tone assumed by the Japanese press in the last few days in its discussion of the California situation is believed by American residents here to be due to a governmental check. Where a few days ago the Japanese papers were praising the California legislation, they now are admitting that the agitation was local to California and that even if the proposed legislation was adopted it would not work a serious hardship to Japan.

Even the Hochi, the most rabid of Japanese papers, has calmed down perceptibly. What the papers still insist on is that any restriction adopted by California or by the United States government, shall not single out the Japanese as its special object. They are convinced Japan that she must look elsewhere than to America to provide for her excess population in the future.

Korea, Manchuria, and Formosa authorities are doing their utmost to turn the trend of Japanese immigrants to these places. Japanese themselves would much prefer coming across the Pacific to America as the prospects are much better here.

FIRE LOSS \$425,000. (Special from United Press.) Galveston, Tex., Jan. 23.—An exploding lantern carried by a watchman fired the wharf at Pier No. 12 about midnight and for three hours the flames swept the wharves along the shore. The damage is estimated at \$425,000. Several steamers were towed to safety barely in time to prevent their destruction. Several thousand bales of cotton were destroyed.

## Not Many Store-Sales Are Uninfluenced by Store-Advertising!

The store-sales to-day that are uninfluenced, directly or indirectly, by store-advertising will not have amounted to ten per cent. of the total business of the day. By the direct influence of advertising is meant the sales of articles specifically advertised. By the indirect influence of advertising is meant the articles sold that are not specifically advertised, but are displayed to the customers who are drawn to the store BY THE ADVERTISED ARTICLES. In the latter case, as surely as in the first, the advertising must be credited with the sale.

Observant merchants know that this is true. They should gain courage from the knowledge to strengthen their advertising campaigns to the point of matching their store-hopes and plans.
